

## 26 BL BIBILIFT Tracked Scissor Lifts

ReachMaster introduces Bibilift: small, compact scissor lifts that can travel places no other small scissor lifts have ever gone before for one reason: Tracks. The genius combination of a small scissor stack on a track based chassis presents a complete new range of use for a much safer and more efficient way to get the job done.

The Bibi 26-BL features a 25'11" working height and has both a 220v electric motor and a Honda gasoline engine. Thanks to its tracks the Bibi can drive on sloped and soft surfaces. With the patent-pending Bi-Leveling feature the Bibi 26-BL is able to set up and reach full height on sloped or uneven ground WITHOUT the use of outriggers - something that small scissor lifts have historically never had the capability to achieve.

Basket Capacity	550 lbs
Maximum Working Height	25'11"
Maximum Platform Height	19'4"
Length	6'4"
Minimum Width	4'3"
Maximum Width	4'11"
Height with basket	8'3"
Height without basket	5'4"
Gasoline Engine	13HP Honda iGX390
Longitude Levelling Front	+/- 16°
Longitude Levelling Rear	+/- 20°
Lateral Levelling	+/- 15°
Gradeability	25°
Side Slope	21°
Total Weight	4400 lbs
